Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Reasons for Allowance

Claims 1-8 allowed.

Martynov (6,229,600) teach of spherical aberration detection method comprising focusing an optical beam, dividing it cross-section in at least two concentric zones and each zone is focused on a focus detection system.

As to claims 1-5, the prior of record, taken alone or in combination, fails to disclose or render obvious an optical device comprising means for focusing a first radiation having a first numerical aperture and a second radiation beam having a second numerical aperture different from the first numerical aperture, means for detecting a first focus error signal corresponding to the first radiation beam and second focus error signal corresponding to the second radiation beam, and means for measuring a spherical aberration of the first radiation beam from the first and second error signals, in combination with the rest of the limitations of claim 1.

As to claims 6-8, the prior of record, taken alone or in combination, fails to disclose or render obvious a method for detecting spherical aberration, said method comprising steps of detecting a first focus error signal corresponding to a first radiation beam having a first numerical aperture, detecting a second focus error signal corresponding to a second radiation beam having a second numerical aperture different from the first numerical aperture, and measuring a spherical aberration of the first radiation beam from the first and second error signals, in combination with the rest of the limitations of claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

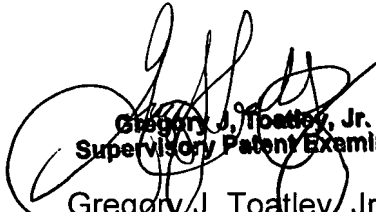

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda H Merlino whose telephone number is 571-272-2421. The examiner can normally be reached on Monday and Thursday.
